

The triiyo Solution

OUR MISSION

When life happens at work, triiyo is your guide.

Our goal is to support organisations to support their managers and employees better, delivering positive outcomes to employee wellbeing, engagement and retention during the moments that matter through the employee lifecycle.

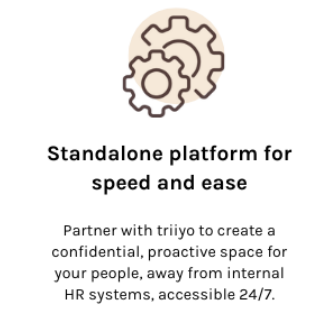

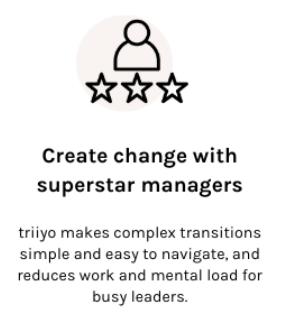

triiyo is a 'plug and play' employee-centric HR SaaS platform that sits external to your internal HR systems. With zero integration, triiyo is quick to deploy providing immediate value to your people. Using industry best practices our agile solution automates manual tasks and streamlines processes to reduce workload and stress for HR teams and people leaders.

We ensure organisations and leaders are equipped to help people navigate the common, complex and often messy life transitions that occur in the workplace, with simplicity and ease, whilst providing a safe, confidential space for people to be supported at the time they need it.

triiyo, your central connectivity and communication platform

Because people matter, triiyo focuses on human connection to provide an easy way to stay connected, informed and supported during any life event that happens at work.

- **Journeys** – Guide managers and employees with best practice, ready-made, time based communication flows.
